5.3.0.0

Fixed on 5/19/2015

2. Fixed a bug that caused an error when loading a video.

Fixed on 11/9/2015

3. Fixed a bug that prevented the user to importing some .pts files into ProTime Estimation.

Fixed on 11/16/2015

4. Replaced the existing licensing system (standalone, KEYLOK, and University) with RLM licensing.

ProTime Estimation version 5.3.0.0 released on 2/3/2016, Wednesday

5.2.1.0

Fixed on 3/13/2015, Friday

1. Fixed a bug that caused an error when trying to run the reports.

Fixed on 4/2/2015, Thursday

2. Fixed a bug that prevented old time studies from being opened.
3. Fixed a bug where closing a time study while a video was running disabled the Add and Remove buttons for the videos.
4. Fixed a bug where changing tabs disabled the video play rate buttons.
5. Fixed a bug where videos didn't load in the MUDA Classification editor anywhere except within the Observed Time tab.
6. Fixed a bug where the header column dividers were not lined up with the right columns.

Fixed on 4/3/2015, Thursday

7. Fixed a bug where adding a task in the Observed Time task, but then deleting it in another tab resulted in an error message.
8. Fixed a bug with the video player screen capture while using Windows 8.1.

ProTime Estimation version 5.2.1.0 released on 4/3/2015, Friday
